

Zadanie 1

Czy lepiej wyprowadzić się od rodziców wkrótce po ukończeniu szkoły, czy poczekać do ukończenia studiów? Napisz **rozprawkę** na ten temat, rozważając go z punktu widzenia młodej osoby i jej rodziców.

Wypowiedź powinna zawierać 200–250 słów.

- When young people turn eighteen, they may choose to stop living with their parents. Some do that; others stay in the family home until they have completed their studies. Personally, I believe moving out as early as possible is good both for the young person and for his or her parents.
- The first advantage for the young adult is that living on your own gives you more freedom. Nobody asks you where you are going or when you are coming back; nobody comments on the music you enjoy. Secondly, you learn to be independent. Being responsible for paying the rent and for household chores teaches you to look after yourself. Admittedly, if you study, work and run your home at the same time, you will have less time for entertainment. This, however, is also an opportunity to learn effective organisation.
- From the parents' point of view the situation also has many benefits. Firstly, they have their whole flat to themselves. No longer do they have to adjust to the lifestyle of their grown-up child, which may be different from theirs. What is more, with small everyday conflicts gone, they have a chance to build a new, more equal relationship with their son or daughter. Finally, they may be proud to see their child change into an independent, self-reliant adult.
- To sum up, in my opinion moving out to live on your own benefits both you and your parents. Nevertheless, everyone should make their own choice depending on their circumstances and preferences.
